

Harnessing Accountability through External Public Audits

GLOBAL LAUNCH EVENT

Tuesday, November 17th, 2020

8:30 - 9:30 am ET /
2:30 - 3:30 pm CET

The International Budget Partnership (IBP), the INTOSAI Development Initiative (IDI), and the World Bank are convening an event to launch a new report which examines national oversight systems and offers recommendations on how to strengthen accountability via public audits.

Audit efforts have never been so important as COVID-19 has required governments to make swift and unprecedented changes to public spending. Many countries still suffer from long-standing obstacles that ultimately limit oversight - just as we need to ensure vulnerable groups are protected and pandemic-related relief reaches those who need it most.

This virtual event will bring together representatives of supreme audit institutions (SAIs), civil society organizations, international development partners, and other public financial management experts to discuss the report's results and critical next steps.
