

## **Fixed-term maintenance and development contract for IDI websites**

### **Addendum 1: Questions & Answers (29 December 2021)**

The following is a list of questions received concerning the ongoing tender, along with their responses from IDI.

**1. Is Joomla competence a must-have in this tender?**

Yes, due to the fact that nearly all IDI's websites currently use Joomla.

**2. What is the expected total value of this 12-month contract? E.g.: 500k NOK or 9M NOK.**

The total contract value is expected to be in the lower end of this range.

All interested parties are asked to differentiate expected costs related to regular maintenance work and expected costs related to additional development work.

**3. In what language should the proposal be submitted?**

Proposals should be submitted in English

**4. Oslo as a requirement: Is that to do meetings in Oslo, or to have the team sit there every day?**

The majority of IDI's staff is located in Oslo and operates in Central European Time (UTC+01:00). It is therefore a requirement that the website development team will be online and accessible during normal working hours in this time zone.

A physical presence in Oslo is not required. Meetings can be conducted digitally.
