### 3i Programme (ISSAI Implementation Initiative)

#### Background

At the 20th INCOSAI, 2010 INTOSAI adopted the comprehensive set of International Standards of Supreme Audit Institutions (ISSAIs). INTOSAI called upon its members to use the ISSAI framework as a common framework of reference for public sector auditing and implement the ISSAIs in accordance with the mandate and national regulations of the respective SAIs. In 2011 through the ISSAI rollout model INTOSAI gave IDI the mandate to support ISSAI implementation. In 2012 the IDI launched the ISSAI Implementation Initiative i.e. 3i Programme Phase 1. The 3i Programme aims to support SAIs in developing countries in implementing ISSAIs. The first phase of the 3i Programme aimed to cover level 2 and level 4 ISSAIs in financial, performance and compliance audit. The programme scope has subsequently been expanded in 2013 to cover the new level 3 ISSAIs as well. This first phase of the 3i Programme has been launched in Arabic, French and Spanish in 2014. As on date 138 SAIs and 2 sub national audit offices have participated in programme interventions conducted in Arabic, English, French and Spanish. Supporting implementation of standards has also been included in the revised mandate of the IDI and its Strategic Plan 2014-2018.

#### D. Programme Budget Monitoring

Budget 2014 (NOK)	Expense (NOK)	Variance (NOK)	Explanation
9 586 779	9 881 914	295 135 3%	

#### E. Key Lessons Learnt (Transferable to other programmes)

- **Understanding & reporting on implementation** - SAIs have varying understanding of the term implementation. It is necessary to arrive at a common understanding. The implementation question in the global survey needs to be broken down further to show progress made by SAIs. Global Survey alone cannot be relied on to provide valid data on implementation. There is a need to set up a more comprehensive mechanism that is also rooted in INTOSAI.
- **Secure adequate resource persons** – Supporting implementation of ISSAIs requires resource persons who have the necessary professional experience of working with and implementing standards. It has been difficult to secure sufficient number of such persons. There is a need to take up specific activities to increase the pool and also to foster the existing network of ISSAI facilitators. Both virtual and face to face interaction needs to be provided for. The skills of existing pools of training specialists could also be upgraded for ISSAI Implementation.
- **Maintenance of products** - A system for maintenance and review of 3i global products needs to be established.
- **Upgrade certification programmes** - The ISSAI Certification Programmes need to be upgraded to provide more detailed input for understanding ISSAI requirements and guidance on using ISSAIs in the audit practice (especially for Financial Audit). Competency framework, evaluations and continuous professional education are some of the other elements that need to be added to the programmes. These programmes should be offered on a regular basis.
- **Quality Assurance** - There is a need to engage with SAIs and regions for the establishment of appropriate quality assurance mechanisms for the implementation of standards.
- **More support needs to be provided at SAI level** both for conducting iCATS and for conducting ISSAI based audits

#### F. Stakeholder Communication Plan

Progress Assessment	
<b>Communication with IDI Board</b> Approval and reporting through Operational Plan and Annual Performance and Accountability Report	IDI Management reports regularly to the Board about the Programme progress

## IDI Global Programme on Specialised Audits – Audit of Lending and Borrowing Frameworks

### Background

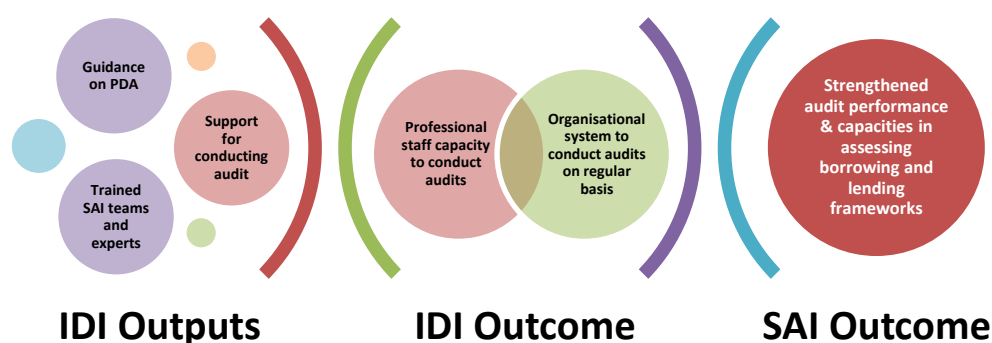

In the last decade, several national governments (referred to as sovereigns) have faced debt crises. The frequency and severity of debt crises and the consequent adverse impact on managing of public finances reinforces the need for promoting responsible lending and borrowing behaviours. An important role in this is played by the national oversight institutions like the Parliaments and SAIs. The INTOSAI Working Group on Public Debt (WGPD) has developed ISSAIs and case studies to focus on public debt audit issues. The ISSAIs provide an overarching guidance to the SAIs engaged in public debt audit. Lack of globally agreed rules and regulations guiding sovereign financing have contributed to irresponsible sovereign borrowing and lending. UNCTAD has developed a set of voluntary principles on responsible sovereign lending and borrowing. The principles are meant to fill this gap.

In 2013, the IDI launched a comprehensive global programme on public debt with a focus on supporting SAIs in strengthening their audit capabilities in assessing the legal and administrative frameworks in the borrowing as well as lending sovereign functions. The global programme, covering 2013- 2016, is run simultaneously in English and Spanish and involves 24 SAIs.

English	3	Audit Planning Meeting	Completed
English	4	Knowledge sharing meetings	Completed

### D. Programme Budget Monitoring

Budget 2014 (NOK)	Expense (NOK)	Variance (NOK)	Explanation
3 156 001	3 318 437	162 436 +5%	The actual costs at the meeting venues have varied from the budget due to slight increase in accommodation costs. Air tickets in some cases cost more than planned.

### E. Key Lessons Learnt (Transferable to other programmes)

-In the field of public debt audit, it helps to involve public financial management experts from institutions like the central banks, multilateral agencies, debt offices to bring clarity in contextual understanding of the pilot audit by the debt auditors, but also to build consensus and better understanding of the role of SAIs in good governance and public financial management.

-Simultaneous delivery of the programme in two language groups imparts a truly global character to the programme as cross cutting issues in different regions and countries are addressed concurrently

Creation of a certified pool of public debt audit champions is a critical input to sustainability of this programme, since lack of adequately skilled resource persons has been one of the biggest challenges of this programme. It is likely that the pool of certified public debt auditors, when available in 2016 could provide the necessary human resources for furthering the dissemination of public debt auditing.

-This coupled with IDI efforts to forge fresh alliances at the global and regional level with other partners and stakeholders to develop strategies and gain financial resources for future dissemination of the auditing guidance on debt audits in these and other regions of INTOSAI would help in sustaining the outcomes of this programme

## IDI Global Programme on Specialised Audits - IT Auditing

### Background

The IDI is cooperating with the INTOSAI Working Group on IT Audit (WGITA) in a global capacity development programme in IT Audit. The IT audit capacity development programme aims to:

- Promote IT audit systems and practices in line with INTOSAI standards and best practices
- Address capacity building needs in the area of IT auditing conducted by the SAIs of developing countries in AFROSAI-E
- To disseminate application of professional guidance in cooperation with INTOSAI working group

The programme focuses on SAI staff at all levels who are engaged in IT audit. It was piloted in AFROSAI-E during 2012-2013. The AFROSAI-E Strategic Plan of 2010-2014 identified IT Audit as a priority area in capacity development in the member SAIs. The SAIs have been faced with an increasing challenge of auditing clients operating on a computerized system environment, creating a need for SAIs to build capacity in the area of IT audit to keep abreast with the modern changes of IT systems and be able to give acceptable recommendations on the client's systems and financial reports in accordance with the INTOSAI standards and best practices.

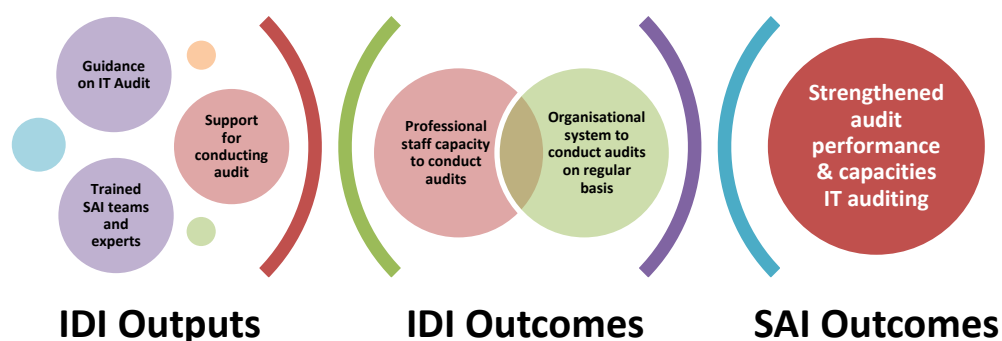

The IDI and WGITA consolidated the guidance on IT Audit in the form an IT Audit Handbook. In order to broaden the reach of the programme in other INTOSAI regions, an E-Learning component of the programme was designed in 2013 and delivered in 2014. The e Course was based on the WGITA-IDI IT Audit Handbook. SAIs participating in the global programme have been provided support in audit planning through two audit planning meetings held in 2014. They are expected to carry out the audits and issue their reports in 2015.

#### D. Programme Budget Monitoring

Budget 2014 (NOK)	Expense (NOK)	Variance (NOK)	Explanation
2 523 925	2 276 637	247 288 (-10%)	In the face to face meetings, savings have been achieved due to lower venue costs than anticipated, largely due to subsidised meeting venue and accommodation provided by host SAIs in their own premises or at negotiated rates with hotels.

#### E. Key Lessons Learnt (Transferable to other programmes)

1. A comprehensive technical guidance is essential for capacity development programmes in specialised audit areas like IT Audit. This helps to disseminate uniform interpretation and audit procedures for the pilot audits, this providing a foundation for an INTOSAI wide standard and quality assured work. WGITA-IDI Handbook developed prior to the launch of the Global programme is an example of this work.
2. Expected outcomes of the pilot programme which was conducted in AFROSAI-E are beginning to emerge, as seen from the further utilisation of certified IT Audit champions in dissemination of IT audit guidance as well as the SAIs continuing to conduct IT Audits. Conducting programmes in cooperation with regions facilitates sustainability.
3. In order to ensure sustainability of our efforts a long term cooperation with WGITA for fostering a community of practice, offering the programme on a regular basis and maintaining the product created is necessary
4. Since more and more governments function in an E-environment especially in maintaining budgets and accounts, the IDI on its own and in cooperation with different INTOSAI regions could focus on disseminating IT audit skills for financial sector IT audits.

**INTOSAI Capacity Building Committee (CBC) Support Programme****Background**

In 2012, the INTOSAI CBC expressed a need to enhance participation of INTOSAI regions in its meetings and to disseminate CBC guidance for enhancing SAI capacities. The IDI agreed to be the implementing partner for this programme. The programme is funded by DFID and is being delivered in INTOSAI regions from 2012-2015.

In 2013, the IDI and DFID agreed to enhance the scope of the programme to provide comprehensive capacity development coverage. The programme objective is to better connect SAIs in developing countries to capacity building initiatives being led by the INTOSAI CBC by enabling developing countries SAIs to attend CBC meetings and through capacity building activities to improve the professional and organisational capacities.

#### E. Key Lessons Learnt (Transferable to other programmes)

<ol style="list-style-type: none"> <li>For achieving the desired results of capacity development interventions, it is useful to follow the IDI service delivery model. The change in the programme design matrix to incorporate this model, though on a limited scale, was helpful in achieving some value added results.</li> <li>An important lesson learnt is the usefulness of a cooperative audit format for audits on specialised areas , and especially in circumstances where individual SAIs have scarce technical skills, to benefit for a pool of resources in a cooperative audit programme. This format is useful to be adopted in other capacity development interventions of similar nature. Cooperative Audits. <i>To further strengthen the cooperative audit support eLearning courses could be provided for more input on the audit topic and methodology as per standards. A quality assurance mechanism could also be set up to provide independent assurance that the audits conducted under this programme meet ISSAI requirements.</i></li> <li>For two of the regional programmes, AFROSAI-E and CAROSAI, the likeliness of sustainable impacts is higher as these regions have committed to following up on the programme results through other initiatives. Therefore the impact of a programme is likely to increase when relevance is ensured and sufficient support is provided.</li> <li>Some regional programmes need more continuous follow-up . Dissemination of guides was not accompanied by support from experts on the topic or by guidance through operationalization of the material by the CBC thereby reducing the programme effectiveness.</li> <li>After the initial involvement of the heads of SAIs, no activities have been directed towards the heads of SAIs or top management in the subsequent phases.</li> <li>Exit strategy and follow up on the programme needs to be developed.</li> <li>The component regarding participation in the CBC meetings is not linked to the other components of the programme and the link to the overall programme objectives is unclear.</li> </ol>

### Certification Programme for Training Specialists in ARABOSAI

#### Background

This programme responds to an urgent need expressed by ARABOSAI to replenish the pool of IDI certified trainers. It helps ARABOSAI fulfil its strategic goal of “building SAI’s capacity” through training and development of human resources. This programme is also aligned with IDI Outcome 1 of its strategic plan 2014-2018 “Effective SAI Capacity Development Programmes” and IDI outcome 3 “Stronger regional bodies, networks and communities” as it contributes to strengthening the professional capacity of SAI staff and to reinforcing the regional capacity by creating a new regional pool of training specialists.

## IDI Regional Cooperation Programme with AFROSAI-E Audit of Externally Aided Projects in Agricultural and Food Security

### PROGRAMME ON HOLD DUE TO EBOLA OUTBREAK

#### Background

The countries in the southern region of African continent are among the highest recipients of development aid for poverty reduction. Aid for agricultural development and strengthening food security is one of the most important and component of development aid. Enhancing the aid effectiveness is high on the agenda of development partners, and one of the means to achieve this agenda is the audit of moneys received as aid for development projects. Supreme Audit Institutions, can play an important role in assessing the aid effectiveness through financial and value for money audits.

The SAls from southern, west and east African countries are members of AFROSAI-E. The AFROSAI-E Corporate Plan for 2010-2014 has identified the goal of strengthening organizational and professional capacities of the member SAls as one of the priorities. The IDI will cooperate with the AFROSAI-E region in implementing a capacity building programme for enhancing support to SAls capacity to provide greater public accountability on public expenditures, by performing financial and performance audits, thereby reporting what government programmes and policies achieve, and where they fail. The programme is aimed at building capacity in up to 1 SAls in AFROSAI-E region whose governments are recipients of substantial development aid. Through the programme, the SAls will be able to conduct such audits on agricultural and food security sectors financed through development aid. The Objectives of the Programme are:

- Support SAls efforts to improve quality of audit work toward its alignment with international best practices, specifically the International Standards for Supreme Audit Institutions (ISSAIs).
- Improve the level of involvement of SAls in the audit of external aid funded projects.
- Decrease the impact of audit costs in development projects while increasing the level of ownership at country level.

The programme is fully funded by the International Fund for Agricultural Development (IFAD)

## INTOSAI Donor Secretariat

### Background

The Memorandum of Understanding between the INTOSAI and Donor communities was signed in late 2009, to improve SAI performance in developing countries, through scaled-up and more effective support to SAIs. It seeks to address the challenges in coordinating support provided to SAIs from the INTOSAI and Donor communities, and ensure that support to SAIs is owned and led by the SAIs. It brings together the entire INTOSAI and Donor communities to identify and address challenges and realise opportunities that exist at a global level. Phase 1 of the INTOSAI-Donor Cooperation ran from June 2010 to December 2012. The program for phase 2; *INTOSAI-Donor Cooperation Program Document Phase 2 2013-2015* was agreed by the INTOSAI-Donor Steering Committee at its 5<sup>th</sup> meeting in London, October 2012. At the 6<sup>th</sup> INTOSAI-Donor Steering Committee meeting in Beijing, China, the 2014 work plan was approved. The Program Document and the work plan consists of 7 different themes: 1) INTOSAI-Donor Cooperation Management 2) Funding Mechanisms and Project Identification 3) SAI Performance Measurement Framework 4) Knowledge Centre on Support to SAIs 5) Strengthening the Supply of Support to SAIs 6) Research Agenda 7) Monitoring and Evaluations.

### A. Programme Profile

Full Name & Duration	INTOSAI-Donor Cooperation, Phase 2, 2013-15: Support to the INTOSAI-Donor Secretariat.
Programme Status	Implementation Phase
Participating Group(s)	Global
Participating SAIs	144 SAIs in developing countries and territories. SAIs in developed countries also benefit from production of relevant global public goods.
Level of participating staff	All
Cooperating Partners & SAI in-kind support	<p>INTOSAI Partners include all four INTOSAI goal Committees, all INTOSAI regional bodies, AFROSAI-E and CREFIAF.</p> <p>In-kind staff support from: SAI Norway, SAI Brazil.</p> <p>Other in-kind support (e.g. translations, hosting workshops and providing facilitators) from SAIs and donor agencies.</p> <p>Donor signatories to the INTOSAI-Donor Memorandum of Understanding: African Development Bank, Asian Development Bank, Australia, Austria, Belgium, Canada, European Commission, France, GAVI Alliance, Inter American Development Bank, IMF, Ireland, Islamic Development Bank, Netherlands, Norway, Sweden, Switzerland, The Global Fund, United Kingdom, United States of America, World Bank.</p> <p>Observers: GIZ, IFAD, OECD, Republic of Korea.</p>
Funding Sources	<p>Core funding from Austrian Development Agency (100 000 EUROS per year), Irish Aid (250 000 EUROS a year), NORAD (Norway, 2 000 000 NOK per year)), DFID (UK, 1 548 586 in 2014 and 2 244 004 in 2015) and SECO (Switzerland, 200 000 Swiss Franc).</p> <p>Earmarked funding from World Bank (70 000 USD for SAI PMF in 2014).</p>

<sup>17</sup> SAI outcome indicators are used for monitoring the overall performance improvement of SAIs. Such high level performance changes are the result of all forms of SAI capacity development and can not be attributed solely to the INTOSAI-Donor Cooperation.

### Progress Assessment

<p>The INTOSAI-Donor Secretariat is continuously communicating with its stakeholders. The Chairs and Vice-Chairs of the INTOSAI-Donor Steering Committee (SC Leadership) are having bi-monthly teleconferences to discuss the progress of the INTOSAI-Donor Secretariat. The Steering Committee meets at least once a year to discuss the progress and the way forward for the Cooperation. The donors of the INTOSAI-Donor Cooperation meets in connection with the INTOSAI-Donor Steering Committee meetings and receive annual reports on the progress made by the INTOSAI-Donor Secretariat.</p> <p>The INTOSAI-Donor Cooperation also participates in INTOSAI-Committees relevant for its activities: for example on the SAI PMF it reports to the WGVBS and is acting as an observer on the CBC-SC3.</p> <p>The INTOSAI-Donor Secretariat is also regularly represented in different donor-forums and meetings.</p>	On track

#### G. Programme Evaluation Plan

#### Progress Assessment

The INTOSAI-Donor Cooperation will go through an impact assessment, starting in 2014. The purpose will be to assess the impact of the Cooperation to date and should be completed in early 2015 to allow the INTOSAI-Donor Steering Committee draw on its results for the design of the Cooperation beyond 2015. #### H. Contribution to IDI Gender Goal

#### Progress Assessment

<p>The invitation letters sent out by the INTOSAI-Donor Secretariats for trainings encourage the SAI/organizations encourage gender balance when nominating participants for trainings. Trainer teams are trying to composition to be gender balanced as much as possible.</p>	<p>The Secretariat took specific measures to facilitate greater female participation, including using female instructors and supporting the attendance of a male relative for female participants that were, for religious and cultural reasons, unable to travel overseas unaccompanied</p>

Key Risks to Programme Success & Sustainability		Risk Response	Residual Risk	Risk Owner
<b>New Risk (2013)</b>	Donors and SAI providers impose SAI PMF assessments on developing country SAs, reducing ownership of the SAI PMF and leading it to be regarded as a donor tool, reducing its eventual use.	Continually raise the issue on SAI PMF training, at SC meetings and with donors and SAI providers in other fora.	Some donors and SC members continue to misuse SAI PMF, potentially damaging its reputation as an INTOSAI owned product.	IDI (INTOSAI-Donor Secretariat) and SC members
<b>New Risk (2014)</b>	SAs are unwilling to share their SAI PMF assessments, for both quality assurance (QA) purposes (reducing quality of assessments) and improvement purposes (reducing quality of the final SAI PMF)	Arrange a series of SAI PMF Knowledge Sharing and QA Workshops in early 2015, to promote sharing of SAI PMF assessments and raise importance of QA.	Some SAs have SAI PMF assessments that have not been subject to independent QA, and some opportunities to strengthen the final SAI PMF are missed.	IDI (INTOSAI-Donor Secretariat) and SC members
Theme 4				
SC donors and SAI providers of support design and implement SAI capacity development projects which do not reflect the MoU principles and INTOSAI priorities.		Communication and advocacy on the MoU principles, training and awareness raising for donors and SAI providers, support to strengthening capacity of SAs to engage with donors and providers. Evaluation of INTOSAI-Donor Cooperation will also look at whether INTOSAI and Donor communities are following MoU principles.	Entrenched behaviour of SC donors and SAI providers does not change.	IDI (INTOSAI-Donor Secretariat) and SC members
Theme 5				
No consensus within the SC on the need to scale up and strengthen providers of support to SAs. Discussions at 6 <sup>th</sup> SC meeting demonstrated lack of consensus in this area.		Look for simple and effective ways to minimise the biggest risks from weaknesses in the provision of support to SAs.	Continuing weaknesses in the supply of support undermines its effectiveness.	IDI (INTOSAI-Donor Secretariat) and INTOSAI CBC
Theme 7				

Key Risks to Programme Success & Sustainability	Risk Response	Residual Risk	Risk Owner
Donors and SAls do not provide access to SAI project evaluation reports, or help facilitate country level studies for an impact assessment of the Cooperation.	Advocate on the importance of evaluations for lesson learning, and guarantee anonymity of country level findings if required.	Evaluation findings may be skewed to those donors and SAls that chose to engage, rather than being a fair representation of the population.	IDI (INTOSAI-Donor Secretariat) and SC members

## IDI Capacity Development

### Background

In its strategic plan 2014-2018 the IDI has identified four areas for development in order to achieve excellence in service delivery.

- Good Governance
- Effective Resource Management
- Professional Team
- Strong stakeholder relations and partnerships

The IDI has also committed to acting on the recommendations of the external evaluation carried out in 2013.
