## Introduction to Text Mining for Auditors

### The Cool Stuff of Natural Language Processing and Machine Learning

Most auditors work with large amounts of text data, and often this is slow and cumbersome work. In this Marketplace session Jan Roar Beckstrom of the OAG Norway will give a non-technical introduction to text mining and ways to handle large amounts of text. He will also give an example on how to classify text using machine learning. If you want an easy introduction to cutting-edge methods for auditors, this is for you.

#### SPEAKER

[Jan Roar Beckstrom](#)

Chief data scientist and head of the OAGN's  
Innovation Lab

He has worked with audit methodology for nearly 20 years. He is also former chair of the INTOSAI Performance Audit Subcommittee.
