# Innovating for Impact

Why are innovations needed? How can innovation take place in challenging environments? Innovations of yesterday may become new ways of working. Some innovations scale, some are replicable, others are not, but could still offer inspiration and food for thought. Welcome to hear more in our SAI Innovations – Innovating for Impact Framing Webinars on 6<sup>th</sup> and 7<sup>th</sup> July!

## SAI Innovations - Innovating for Impact

→ 6<sup>th</sup> July 2021 | 9.30 - 11.00 CEST (Oslo time)

→ 7<sup>th</sup> July 2021 | 16.00 - 17.30 CEST (Oslo time)

After discussing “Innovative SAIs Going F.A.R.” in 2020, we plan to reflect on “Innovating for Impact” as the main theme of SAI Innovations for 2021. Under this theme, we want to share experiences both from the SAI community and stakeholders of the innovative solutions they have found to increase the audit impact of their work, especially related to audit communication and stakeholder engagement throughout the audits. We should always keep in mind that innovations happen everywhere and anywhere and should always be fit-for-context. The July Framing Webinars kick-off this discussion of innovating for impact.

## SPEAKERS

Representatives from the UNDP Accelerator Labs and SAIs will share the innovative methods and ways of working they have explored to contribute to audit impact in their contexts.

Both Framing Webinars have the same content, please register here by **July 2<sup>nd</sup> at 12.00 CEST** (Central European Summer Time) to join one of them.
